

Japan-IAEA Joint Nuclear Energy Management School 2017

July 18th ~ August 3rd

at the **University of Tokyo** and **Fukushima**, Japan

Certificate Course

Four benefits

of participating
in this school

1 Gaining awareness of the most important topics related to the peaceful use of nuclear energy, such as energy policy, economics, nuclear safety and security, radiation risk management and knowledge management.

2 Hearing lectures delivered by internationally recognized experts from the IAEA, Japan and other countries.

3 A unique opportunity to broaden your horizons and meet young people interested in nuclear energy from all over the world.

4 Valuable opportunities to visit NPPs, manufacturers, advanced research reactor and training facilities.

Objectives

To provide an international educational experience for future leaders and managers of nuclear energy programmes in both newcomer countries and those with established programmes.

Preferred participants
Young
professionals
under 40
with managerial potential

Policy makers, employees of NPPs, R&D organizations, utilities, regulators, suppliers, education and training organizations
