

FNCA Held Second Meeting of Discussion Panel on Nuclear Power

On September 1 and 2, the Atomic Energy Commission of Japan (AEC) sponsored the second meeting of a panel formed within the Forum for Nuclear Cooperation in Asia (FNCA), to discuss the issue of cooperation in the field of nuclear power.

The theme of the meeting was the “development of infrastructure to ensure the safety of nuclear power generation.” Each country reported on its efforts to those ends, along with the state of its infrastructure development. All participants then discussed the direction of future cooperation. They also considered activities of the panel itself in the coming fiscal year (starting on April 1, 2009) and thereafter. The meeting has been chaired by Kunihisa Soda, a member of the Nuclear Safety Commission.
