Nuclear Applications for Health

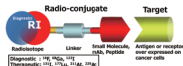

Cabinet Office
The Japan Atomic Energy Commission

Promoting the Development, Manufacturing and Use of Radiopharmaceuticals and Strengthening Their Supply Chain

International Trends

- Rapid global market growth
- New pioneering therapies with advancements of alpha-emitting radionuclides (Ac-225 & At-211)

Efforts in Japan

The Advisory Committee, established under the Japan Atomic Energy Commission, is currently discussing key issues, including:

- Support measures for new radiopharmaceuticals and RI raw materials
- Regulatory optimization
- Human resource development
