

The 30th KOREA ATOMIC POWER ANNUAL CONFERENCE

April 28 - 29, 2015
SEOUL, KOREA

"Toward Another 30 Years: Atoms for People"

Korea has now come to the end of journey with Atoms for Peace, and is reborn and about to embark on a voyage with Atoms for People to proclaim the resurgence of atomic power. Korea is slated to restart the atomic engine that can quench thirst of the warming planet and provide the needy nation with clean, sustainable, dependable energy source. Korea has transformed the waste land to rich soil anchored to nothing but human power to mount the atomic throne, which could have never taken place without the civic backup. They are prone to baseless fictions rather than technical facts, however. This can only be alleviated by a comprehensive and deliberative public outreach to sympathize with the bottom truth of all things nuclear.
