

Fukushima and Me

Born in Hirono

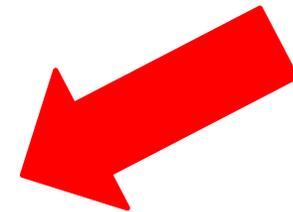

- Hirono town until junior high
- Earthquake at graduation ceremony
- Playing in the mountains, etc.

To university

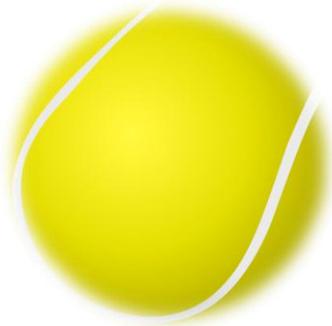

- Moved on to Fukushima University
- Activities in university

Three years in Iwaki

- Moved to Iwaki for refuge life
- High school life begins
- Activities in high school

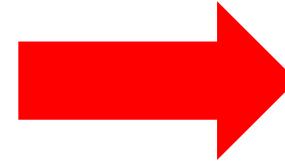

Activities in High School

- Student council
- Club activities
- BEYOND TOMORROW
Tohoku Leaders Summit
- Children's Future Meeting

Born in Hirono

- Grown up in Hirono town until junior high
- Earthquake at graduation ceremony
- Playing in the mountains, etc.

Three years in Iwaki

- Moved to Iwaki for refuge life
- High school life begins
- Activities in high school

To university

- Moved on to Fukushima University
- Activities at the university

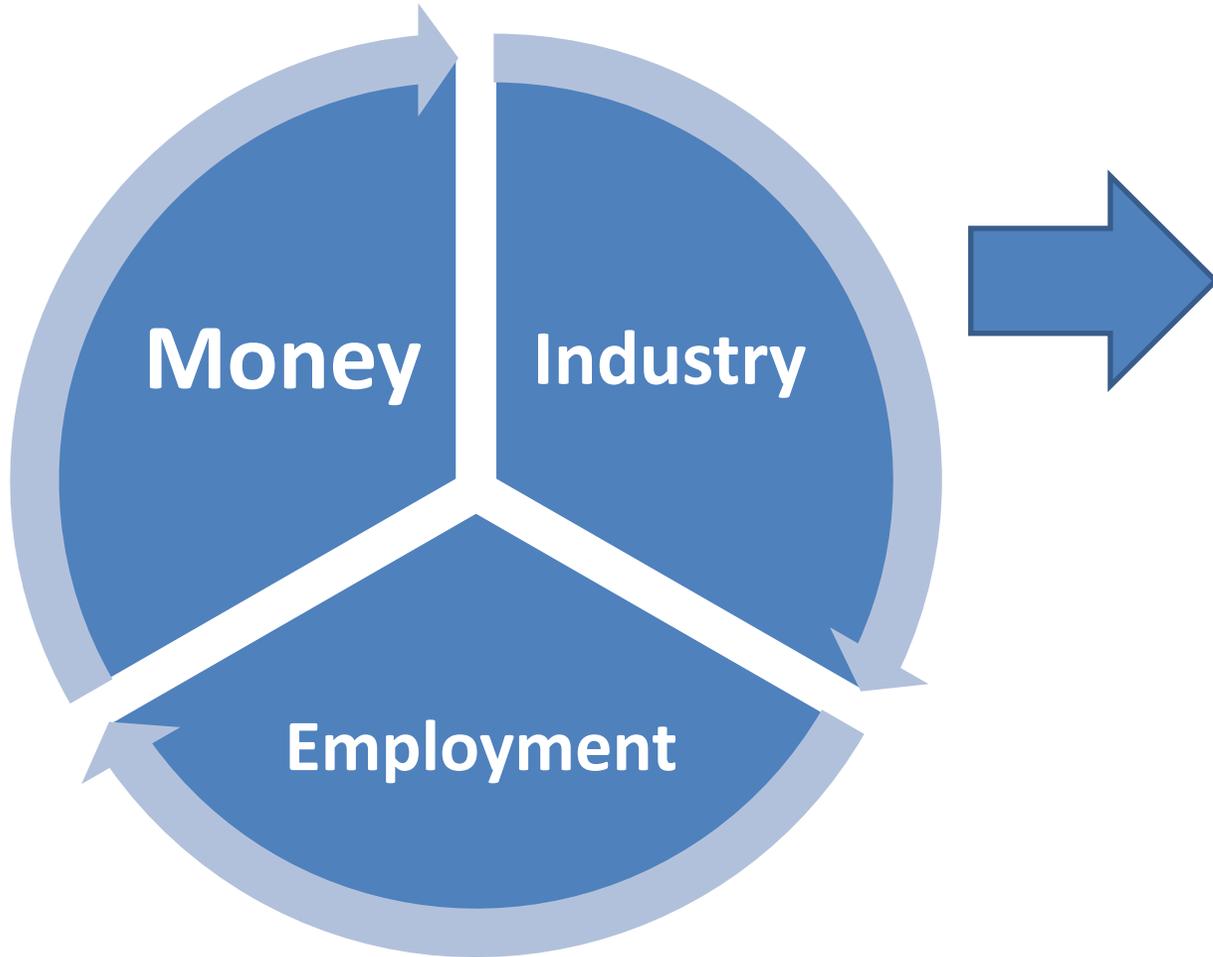

Activities in University

- Student's Association
- Children's Future Meeting
- Excursions
- UN World Conference on Disaster Risk Reduction General Forum
- Joint publication of a book
- Inspection tour of Fukushima Daiichi Nuclear Power Station
- Study abroad to Australia
- NHK "Future School from Tohoku"
- Fukushima Charm Creation Project

Relations with the Energy Industry, Such as Nuclear Power

Energy is...

Although I was in favor of nuclear power station decommissioning after the accident, it was not immediate.

Why not?

It was because the effect produced by nuclear power stations has become a bottleneck.

Thoughts towards Fukushima in the future

Does not mean
encouraging just
returning forthright

Future of the town
(education / disaster
prevention / happiness)

Future for children, the
existence of adults

Many
encounters

Industrial
upsurge period

A coastal landscape featuring a rainbow in a cloudy sky. In the foreground, there is a sandy beach with some dark rocks. A concrete breakwater with a rocky section extends into the water. Behind the breakwater is a large, sandy dune. In the background, a forested hillside with a prominent tall tree is visible under a grey, overcast sky.

Thank you for your attention.
