Rolls-Royce

Background and Experience

- Academic and Training – MSci Physics, Risk, Systems Engineering and Project Management
- Nuclear Engineering – Safety, Design and Verification & Validation Governance
- Nuclear Industry – Customer Focused, Business Strategy and Development
- Nuclear Society – UK Ni, ENSYGN, ENYGF17

Message for the future!

The global population is growing and the demand for **safe, clean and reliable electricity** is more important than it has ever been.

We must continue developing the global **nuclear industry** and strive for more **collaboration, innovative technologies** and **harmonization of best practices** to meet the needs of our **future**.
