A successful
WNE Awards
ceremony

New in 2018

WNE 2018:

« Nuclear Excellence, a new era »

Several major developments around the world will bring the Excellence of the nuclear sector to light in 2018: several Generation III reactors will be connected to the network, major maintenance and deconstruction projects will be launched, an abundance of new technologies will be exposed... WNE will be the best opportunity to take stock of all these advances!

Creation of WNE Awards categories for SMEs

About AIFEN

WNE is an event of AIFEN

The AIFEN also known under its English name as the French nuclear industry aims to support joint actions between the French nuclear team and its foreign equivalents belonging to the nuclear community. To do so, France with the AIFEN is the host country of the WNE (World Nuclear Exhibition): the international trade show which gathers the global nuclear community. WNE gives nuclear industrialists an opportunity to meet, network and share ideas. WNE is also a unique opportunity to showcase the diversity of competencies which contribute to the specificity of the nuclear supply chain and in particular the expertise of SMEs mid-cap renowned for their excellence and know-how.
