

33rd Korea Atomic Power Annual Conference

April 25 - 26, 2018 / Busan, Republic of Korea

*'A Time of Change,
Nuclear Energy for Tomorrow'*

Nuclear energy is facing an era of sudden change. It has to deliberate its future strategy based on safety and reliability to cope with the challenge of tomorrow and to keep up with the direction of international energy policy.

At this point, we are now to discuss the pending issues, the direction and measures to be progressed for the future of nuclear industry harmonizing with international energy policy at this KAP 2018 together with all of our honored experts.
