《Restart of shutdown NPPs》

- NRA (established on 2012.09.19) reviews the following applications by operators in conformity with new regulatory requirements (standards) which came into effect on 2013.07.08.
 - Changes in reactor installment license (After preliminary approval, a month of public comment will be normally conducted for official permission)/Plan for construction works (Construction Permit Application)/Operational safety programs (Technical Specification)
- In addition to the NRA approval of the above applications, inspections before & after reactor start-up (Pre-Operational Inspection) are required before resuming commercial operation. Consent of local governments is also required for restart (but is not legally binding).
- Takahama-3 & -4, Ikata-3 and Genkai-3 were cleared by the regulators (NRA) based on the assumption of using MOX fuel.

- On May 22, 2018, Chugoku EPC requested local governments for their consent on applying to the NRA for the reactor installment license (i.e. official safety approval) of Shimane-3. The governor of Shimane Prefecture gave his consent on the application on August 9, 2018, following consents of Matsue city and Shimane Prefectural Assembly in July 2018. Chugoku EPC formally applied to the NRA for the reactor installment license of Shimane-3 on August 10, 2018.
- On June 29, 2018, TEPCO announced that it will start a geological survey comprehensively for the Higashidori nuclear power plant in Aomori Prefecture from the second half of the FY 2018 to the FY 2020. TEPCO started a geological survey at the site of Higashidori on August 28, 2018.
