

# Measures towards the Revitalization of Fukushima (Fukushima Revitalization Headquarters)

T.Niitsuma

Managing Executive Officer

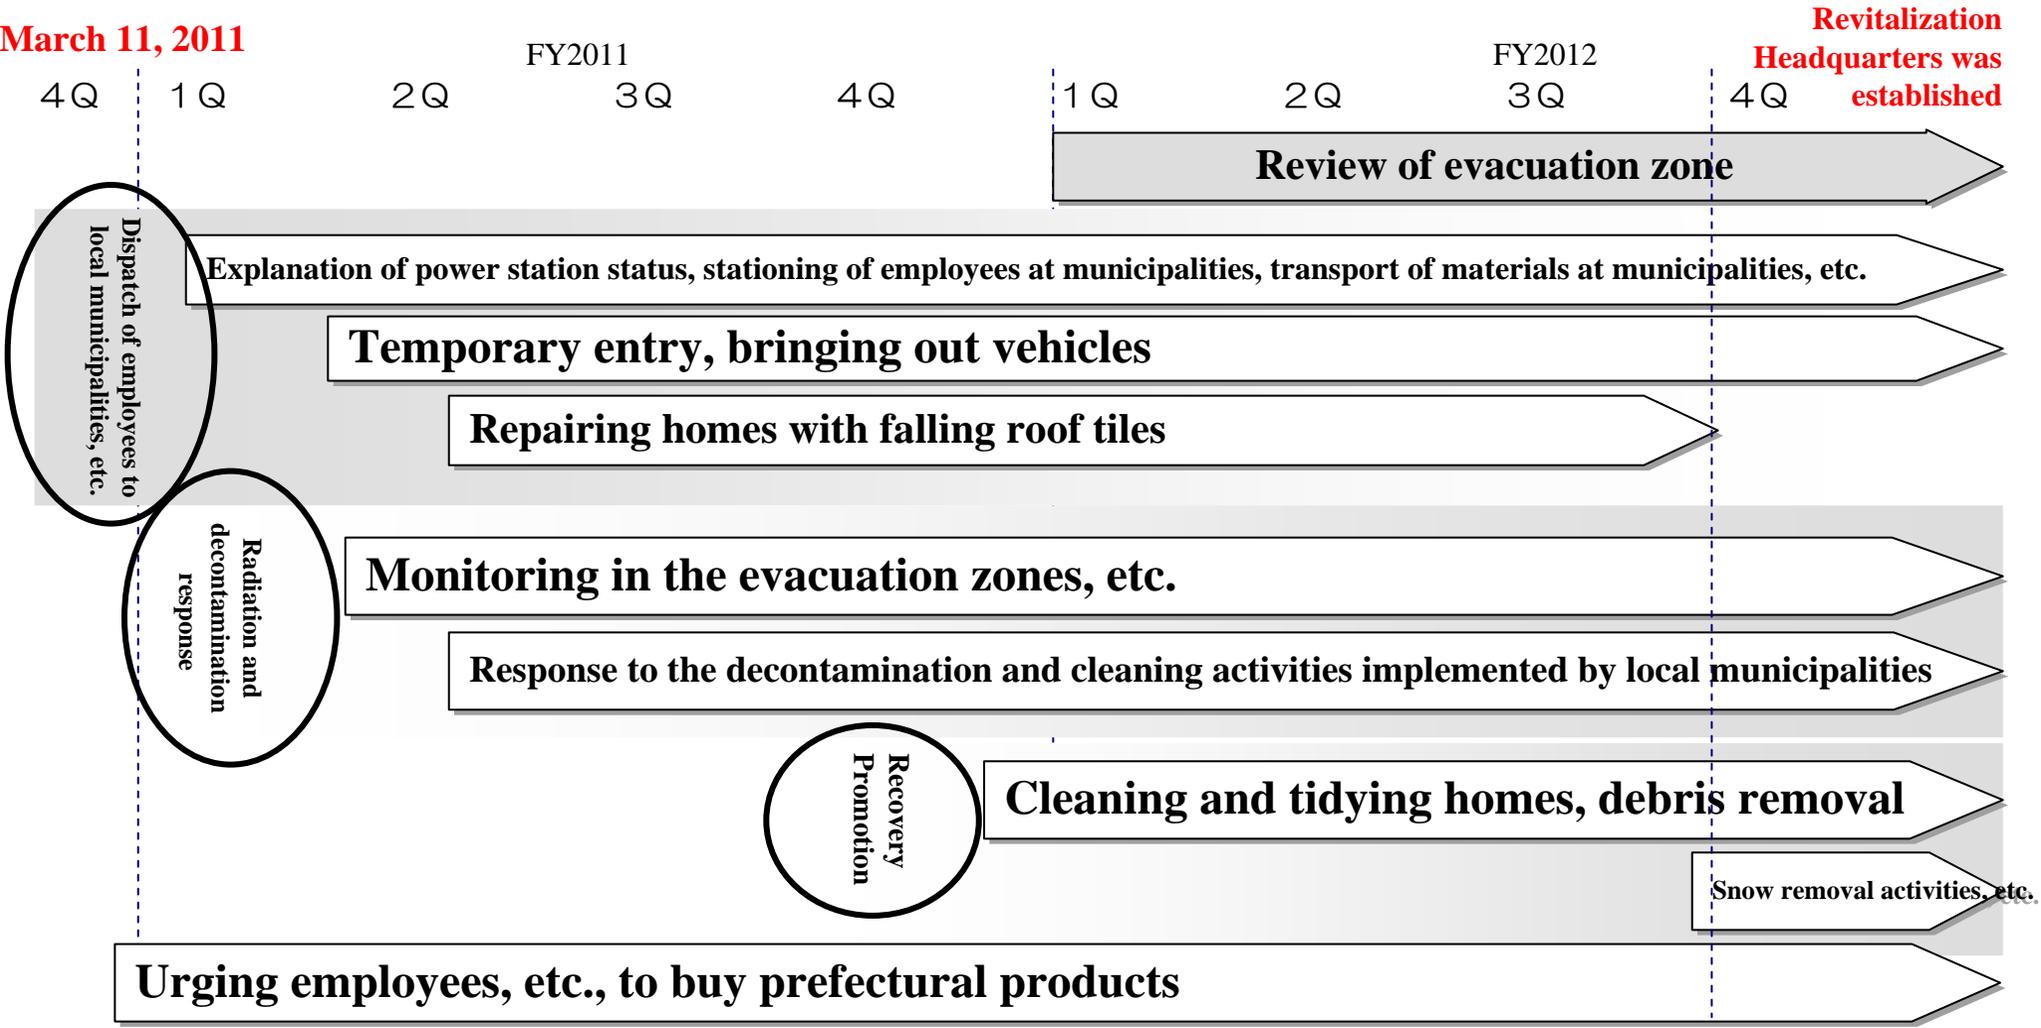

Deputy General Manager of Fukushima Division

Tokyo Electric Power Company

April 25th, 2013

# 1. TEPCO Measures since the Fukushima Accident (1)

- Implemented efforts such as the dispatch of employees to local municipalities immediately after the disaster
- Afterwards, TEPCO sequentially launched radiation and decontamination response efforts in addition to recovery efforts.

# 1. TEPCO Measures since the Fukushima Accident (2)

## <The Contents of the Measures>

Presentation on the Status of Fukushima Daiichi NPS

Temporary Home Escort Assistance

Snow removal

Home cleaning

Monitoring

Net decontamination at the sports grounds

## 2. Towards the Revitalization of Fukushima

### 7th Nov. , 2012 Management Restoration Policy

- **As a party to the accident, TEPCO's main priority is fulfilling its responsibilities for the accident.**

**The Role of the Fukushima Revitalization Headquarters is to respond to the needs of Fukushima prefecture residents**

- We will never forget the suffering the people of Fukushima have gone through
- We plan to stay until all of our responsibilities are fulfilled
- We will continue to payout compensation with courtesy and compassion
- We will further advance the implementation of the revitalization measures

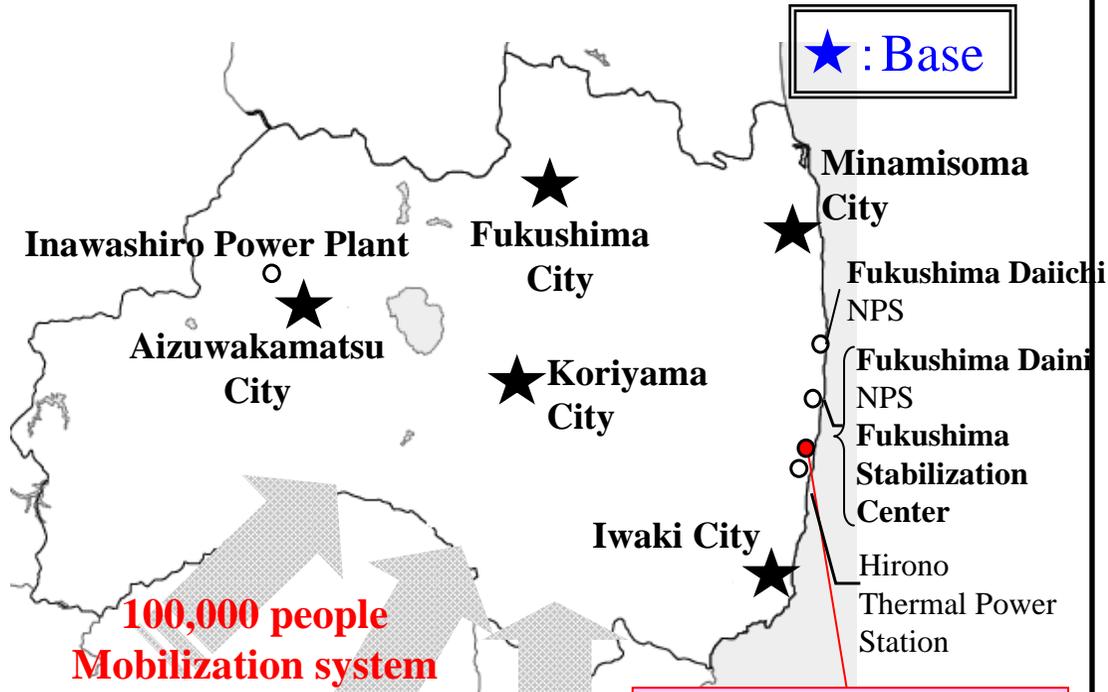

### 1<sup>st</sup> Jan. , 2013 Establishment of the “Fukushima Revitalization Headquarters”

- **Integrate operations related to revitalization at all Fukushima offices**
- **Swift decision-making and action to achieve compensation, decontamination and revitalization**
- **Respond to the needs of Fukushima prefecture residents**

# 3. Organization of Fukushima Revitalization Headquarters

Fukushima Revitalization Headquarters (Es. 2013.1.1)  
 < Representative: Executive Vice President >

**Establish a 4000- people organization**

**Fukushima Revitalization Headquarters Representative is located in J-Village**

## 4. Action plan to fulfill responsibilities for the accident

### Intensifying efforts towards Fukushima's revitalization

- Thorough implementation of “compensation payouts with courtesy and compassion”
- Allocate 300 personnel to advance decontamination progress
- Strengthening operations toward revitalization(100,000 personnel to be dispatched)
- Promotion of Fukushima reconstruction and job creation projects
- Rearrangement of the places of operations and company housing

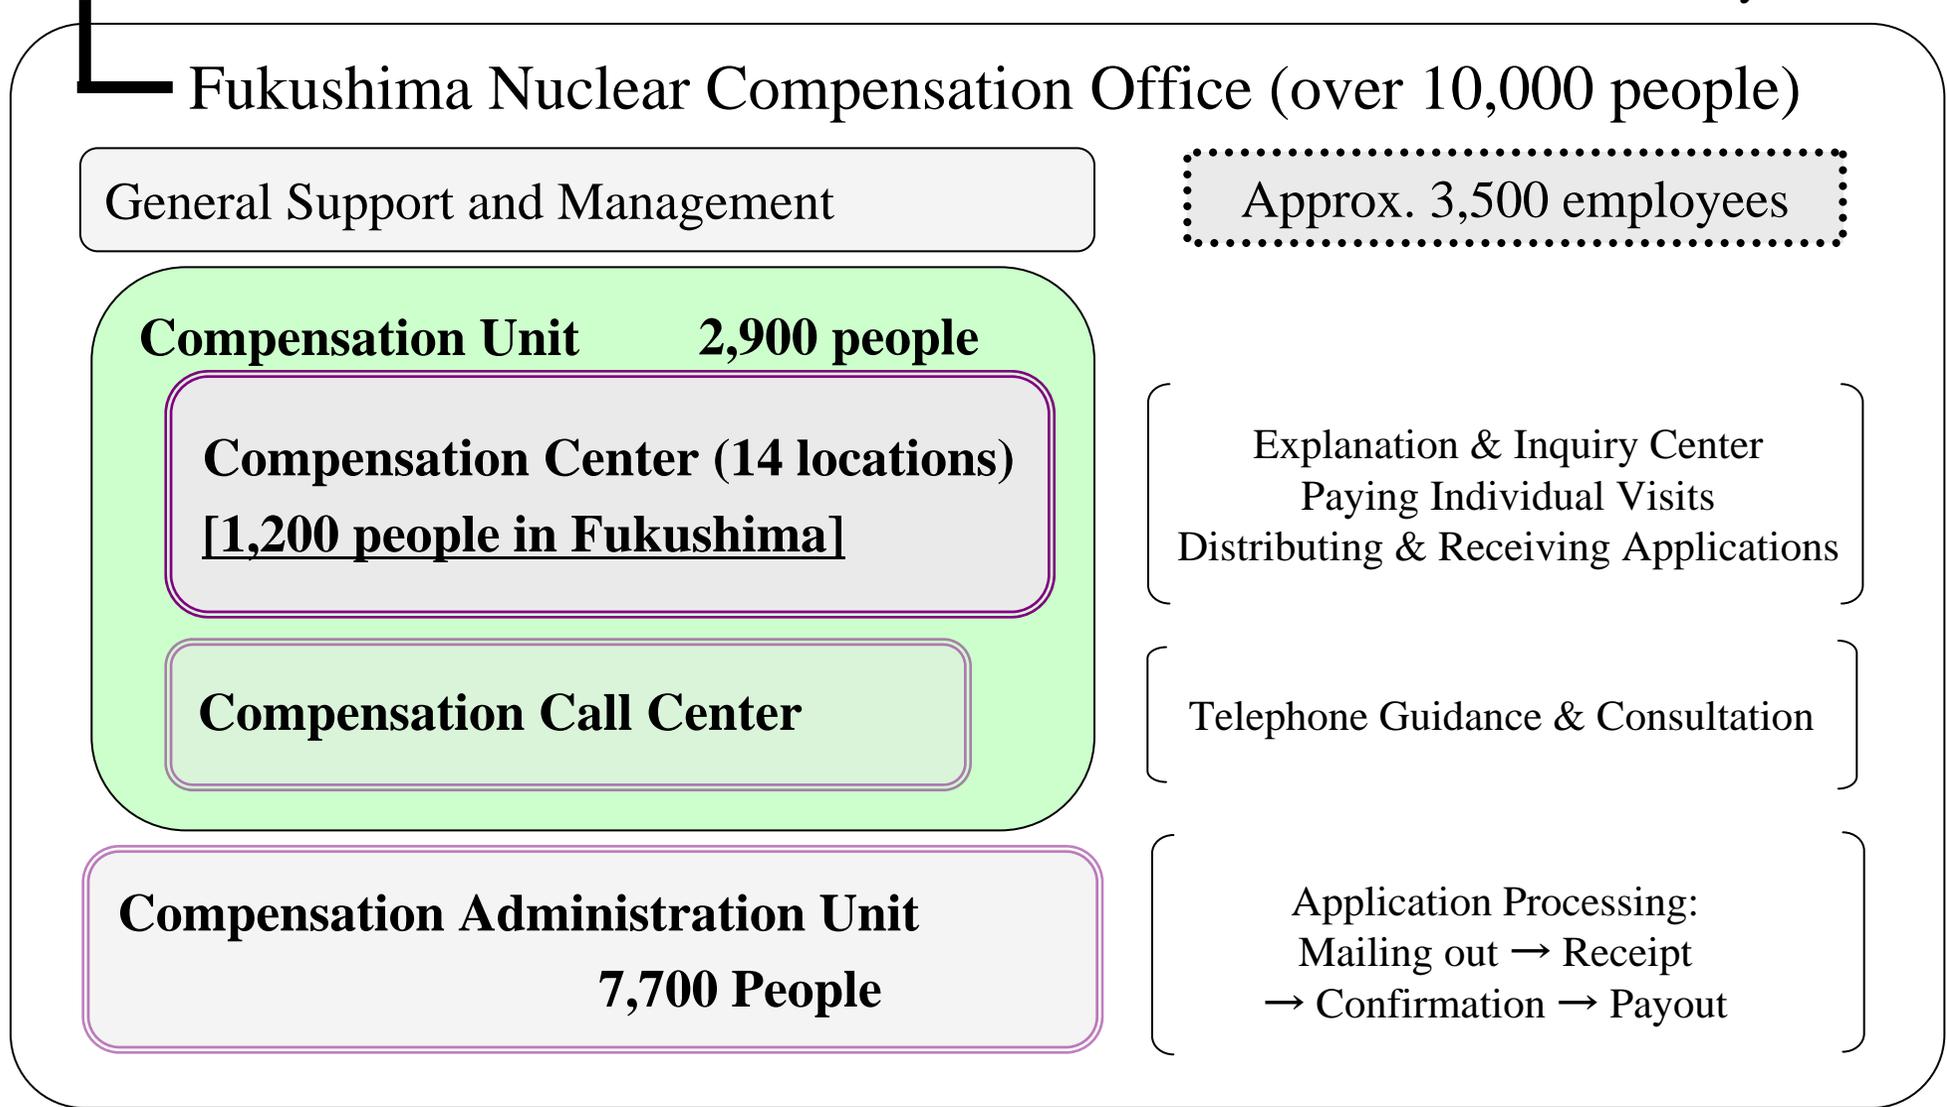

### Formation of a decommissioning framework for Fukushima Daiichi NPS utilizing domestic and overseas expert wisdom

- Prompt and steady transition of Fukushima Daiichi NPS towards safer conditions
- Contribute to local reconstruction while sharing the findings and lessons learned from the accident with concerned parties around the world
- Fostering human resources to support long term decontamination and decommissioning measures

# 5. Compensation (1) Development of Organization

## Fukushima Revitalization Headquarters

As of 1<sup>st</sup> May, 2013

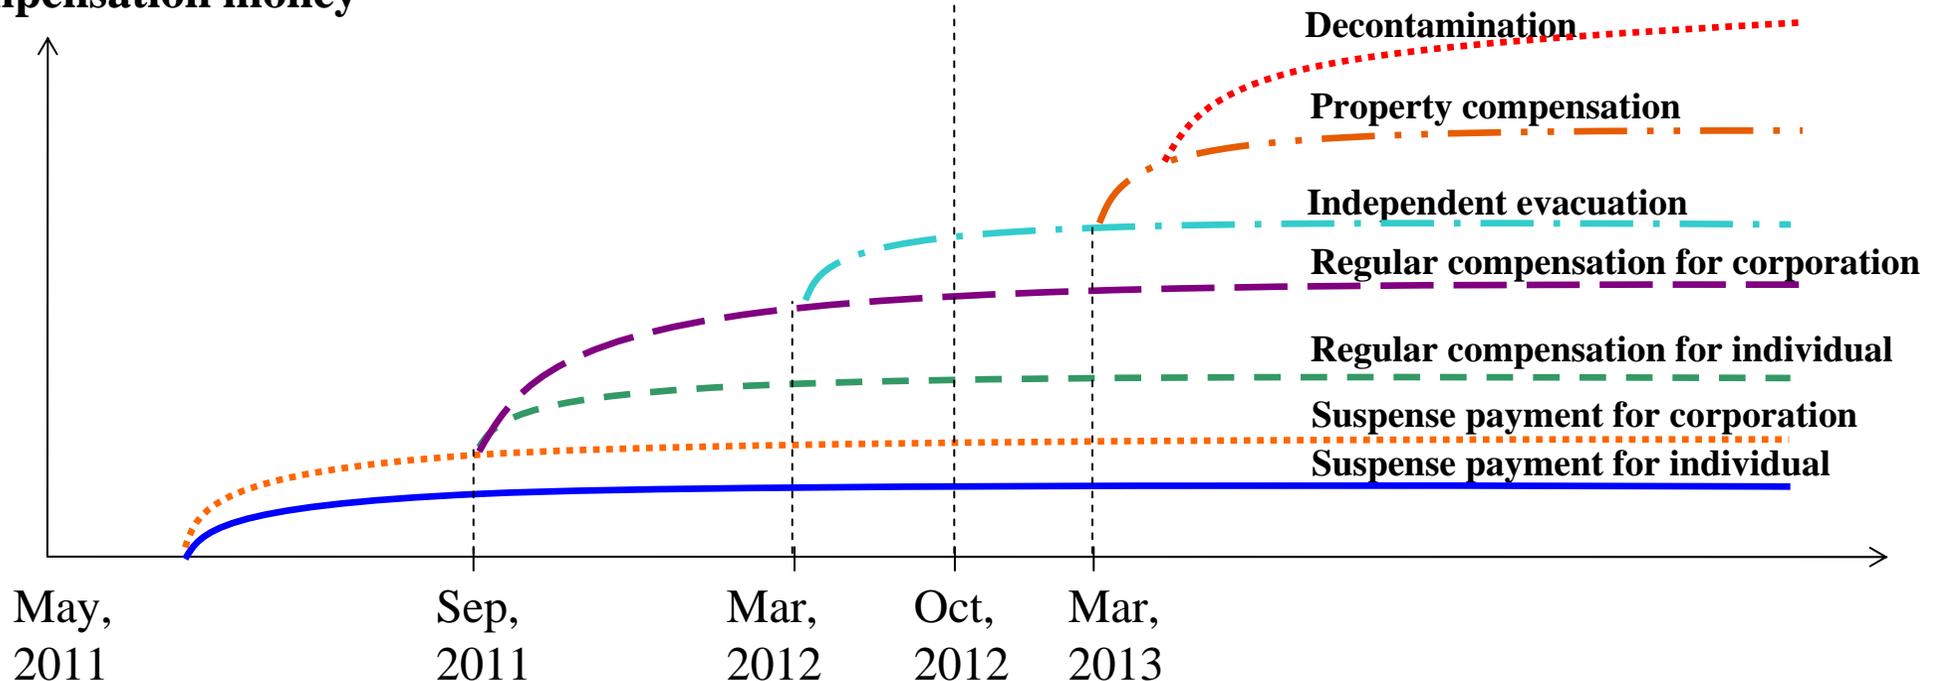

# 5. Compensation (2) Advance in stages

- Suspense payment started in April, 2011, and Regular compensation started in September, 2011
- Oct, 2012 Start of All-inclusive Applications (Allowing for one lump sum applications that would include future portions)
- Mar, 2013 Property compensation (land, buildings, household goods) start

## Roadmap of compensation (image)

Compensation money

Start of All-inclusive Applications

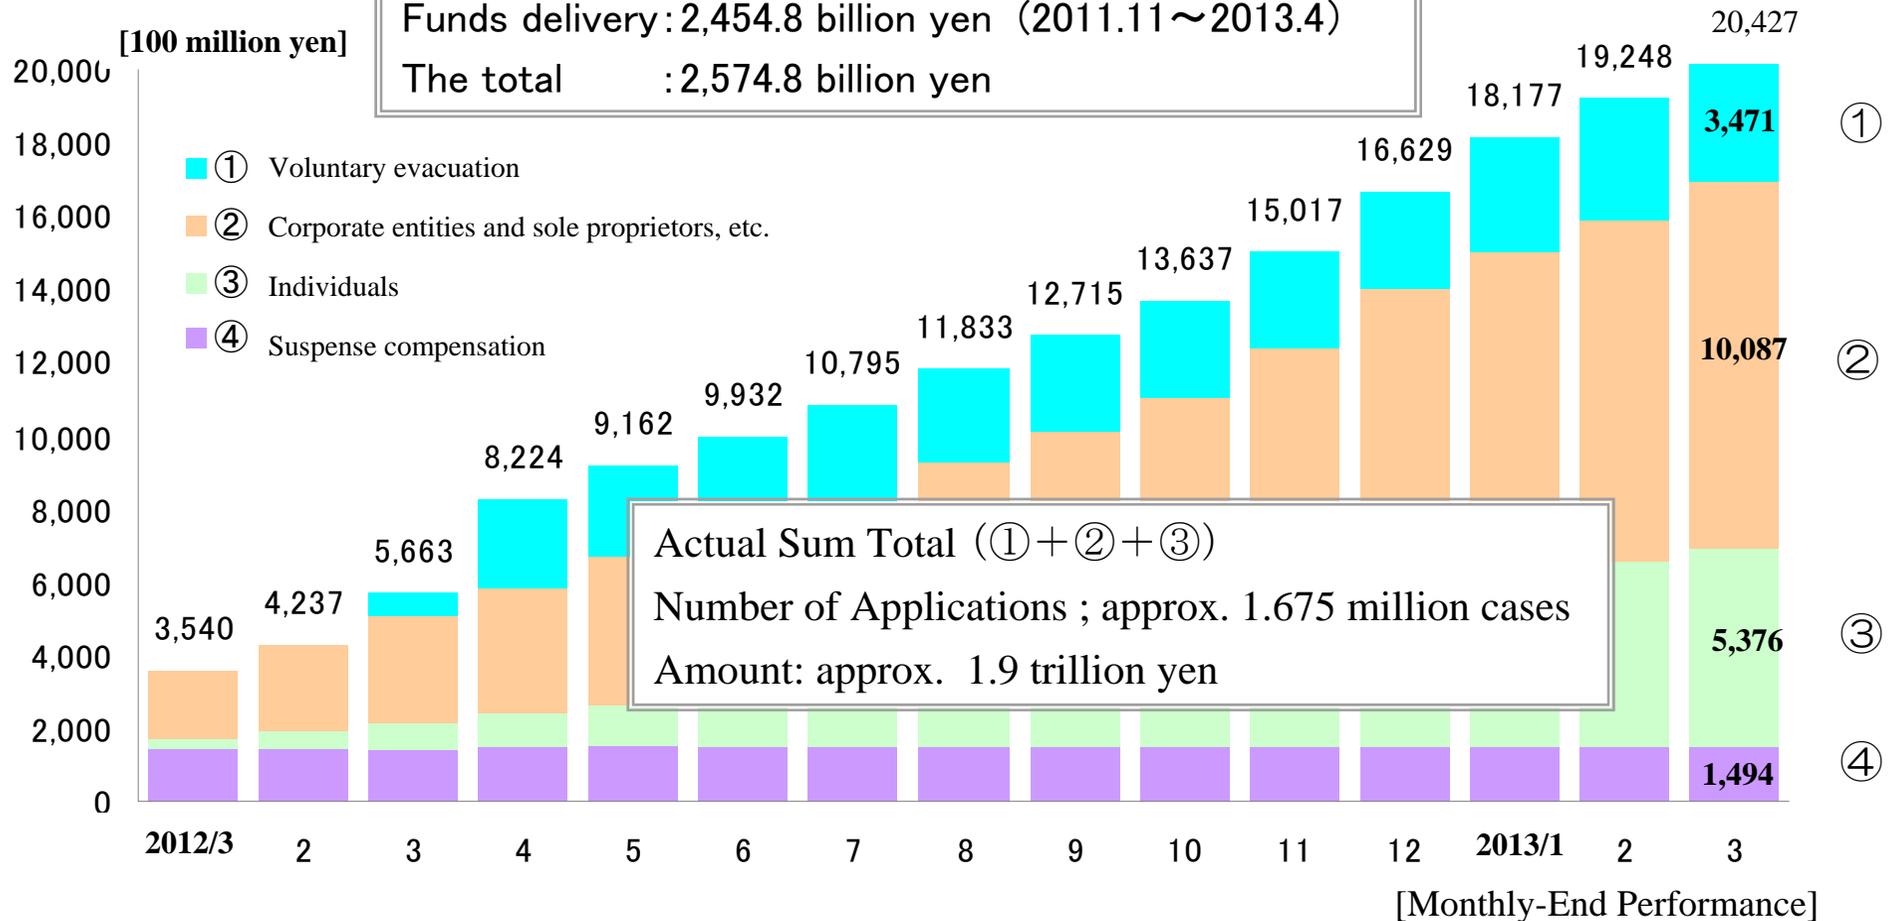

# 5. Compensation (3) Payment Status

## <Compensation Payout Status\*>

\*Compensation Payout Start : October 2011

Necessary total compensation  
Amount Forecast : 3,274 billion yen  
(Estimate at 3<sup>rd</sup> quarter, 2012)

Government compensation: 120 billion yen (2011.11)  
Funds delivery: 2,454.8 billion yen (2011.11 ~ 2013.4)  
The total : 2,574.8 billion yen

# 6. Main decontamination and recovery promotion efforts

- Prompt response to demands from municipalities and residents affected by the disaster
- Increase in personnel and technological cooperation for decontamination through personnel reinforcement (300 person scale)
- Deepening of activities close to the region through the mobilization of 100,000 employees per year

## 1. Acceleration of lifestyle reconstruction and reducing the burden of refuge life

- Dispatching of personnel to respond to temporary returns/temporary accommodation
- Work in temporary housing, etc.
- Weed removal in cemeteries around equinoctial week
- Closing LP gas cylinder valves and measuring radiation dosage, etc.

## 2. Paving the way for an early return home, etc.

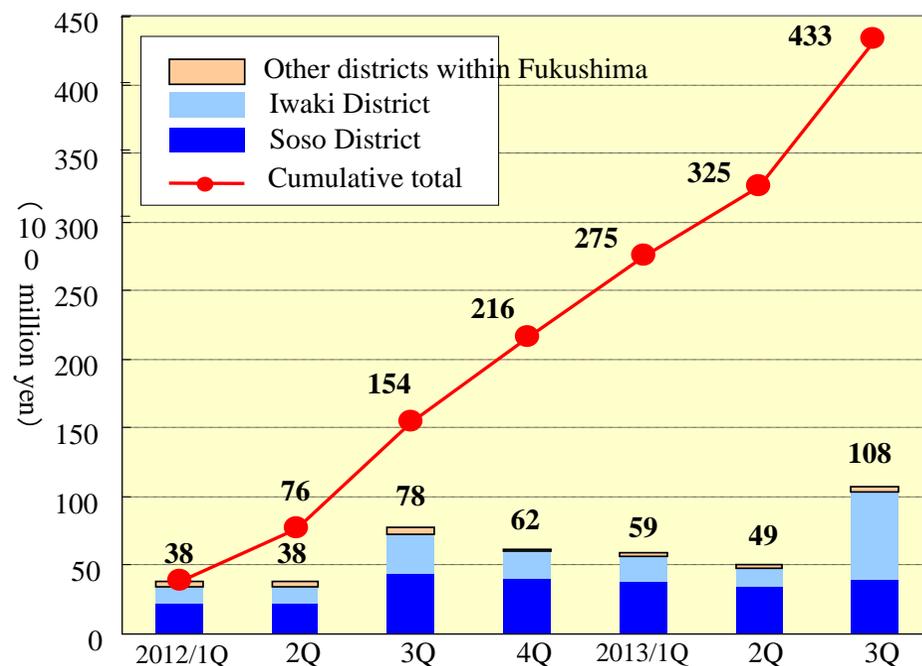

- Removal of debris from regions where the evacuees are from
- Cleaning and tidying the homes of evacuees
- Expanding response to decontamination work advanced by the government, prefectures, and municipalities
- Expanding monitoring that leads to safety and security
- Installation of wells in households that are returning home early (Katsurao), etc.

# 7. Main efforts for Economic Recovery and Job Creation, etc.

- Installation of a cutting-edge coal-fired thermal power
- Recovery of J-Village (national soccer training center)
- Redevelopment of activity bases and company housing based on the situation of evacuees returning home, etc.
- Creation of local employment ~partial relocation of company work, resumption of recruitment by schools in the prefecture~
- Response towards the resumption of circular agriculture (transport of accumulated cow manure compost, etc.)
- Continued promotion of procurement from the local area

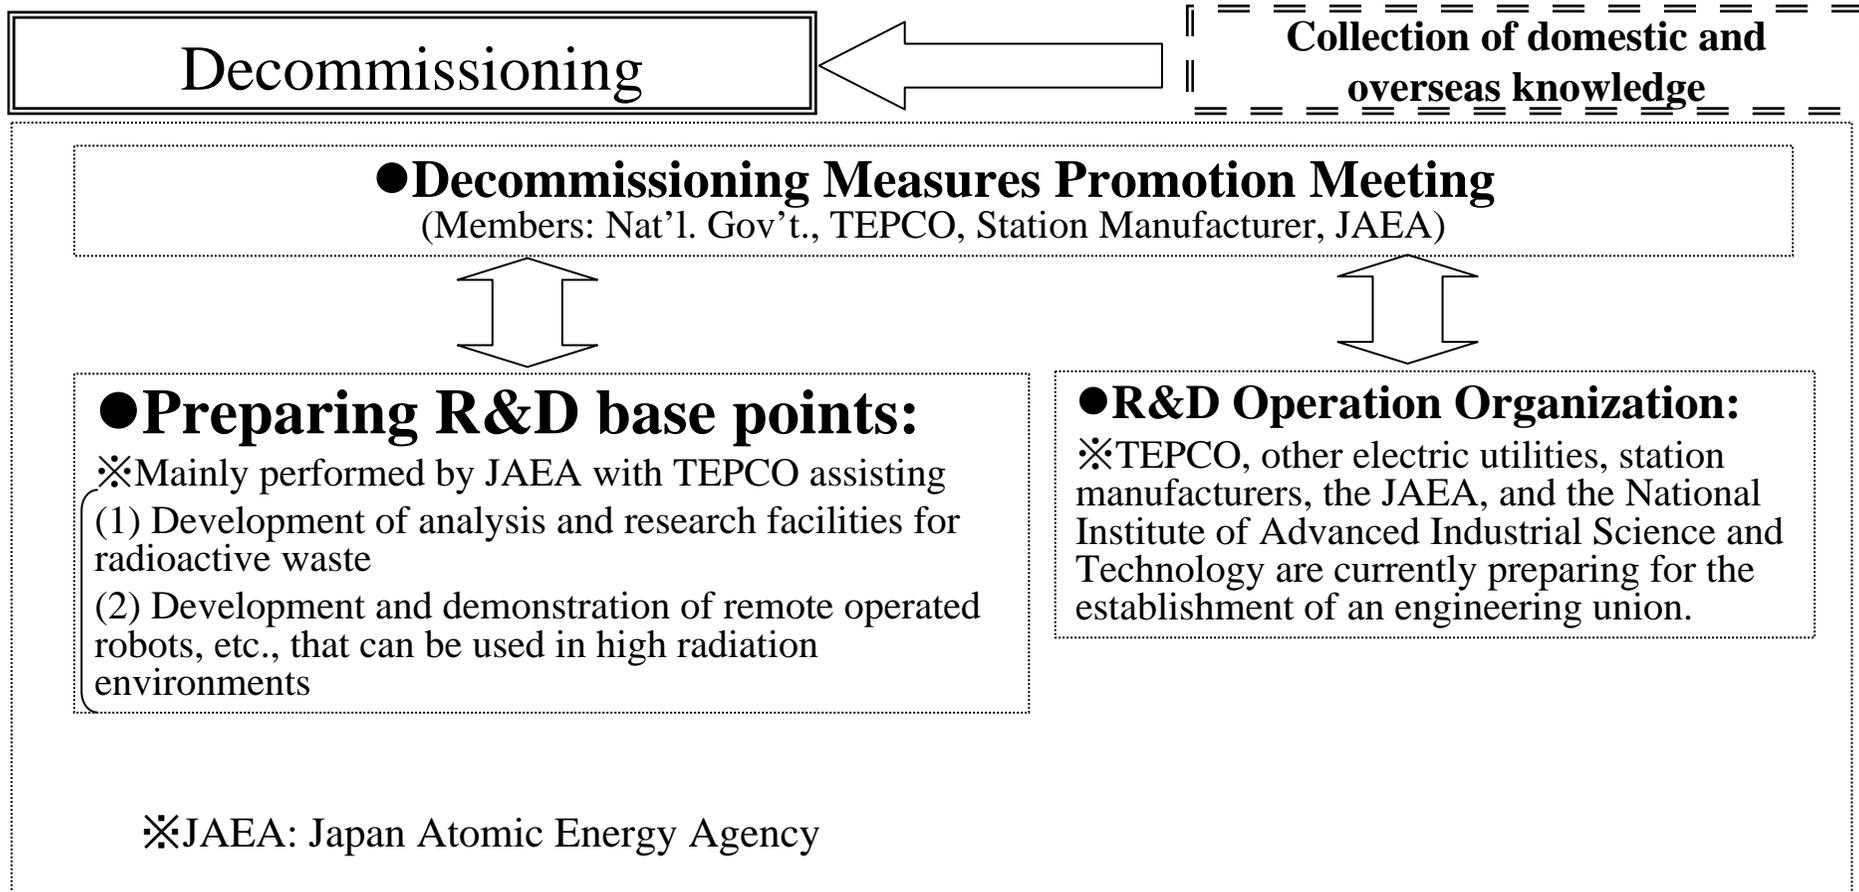

<Overflowing compost in a compost storage facility>

<Procurement conditions from local businesses (by area)>

## 8. Collection of Overseas Knowledge regarding Decommissioning and Recovery

→ **TEPCO will proactively support or participate in various activities performed during advancement of reactor decommissioning as part of efforts to achieve regional restoration.**

# Conclusion

## ● We will

(1) Dedicate all our efforts towards compensating the nuclear accident victims, decommissioning and decontamination, and the recovery of Fukushima, with the strong resolve that

**“Fulfilling our responsibilities for the Fukushima Nuclear accident is our number one mission”**

**“Reform and revitalization of TEPCO is not possible minus Fukushima’s recovery.”**

(2) **“Work on further implementation of stabilization and decommissioning measures at Fukushima Nuclear Power Station as well as prompt and accurate transmission of information,”** paying careful consideration to the opinions of the evacuees and feedback from broader society.

**End**

---

**Thank you for your kind attention!**
